header

## <random>

### Random

This header introduces random number generation facilities.

This library allows to produce random numbers using combinations of *generators* and *distributions*:

- **Generators:** Objects that generate uniformly distributed numbers.
- **Distributions:** Objects that transform sequences of numbers generated by a generator into sequences of numbers that follow a specific random variable distribution, such as [uniform](#), [Normal](#) or [Binomial](#).

Distribution objects generate random numbers by means of their `operator()` member, which takes a *generator object* as argument:

```
1 std::default_random_engine generator;
2 std::uniform_int_distribution<int> distribution(1,6);
3 int dice_roll = distribution(generator); // generates number in the range 1..6
```

For repeated uses, both can be bound together:

```
1 auto dice = std::bind ( distribution, generator );
2 int wisdom = dice()+dice()+dice();
```

Except for [random\\_device](#), all standard generators defined in the library are *random number engines*, which are a kind of generators that use a particular algorithm to generate series of pseudo-random numbers. These algorithms need a seed as a source of randomness, and this seed can either be a single value or an object with a very specific `generate()` member function (see [seed\\_seq](#) for more info). A typical source of randomness for trivial tasks is time, such as the information provided by `time` or `system_clock::now` (for a typical example, see `uniform_int_distribution::operator()`).

As an alternative, trivial random numbers can also be generated using `cstdlib`'s functions `rand` and `srand`.

### Generators

#### Pseudo-random number engines (templates)

## &lt;random&gt;

**distributions:**

[bernoulli\\_distribution](#)  
[binomial\\_distribution](#)  
[cauchy\\_distribution](#)  
[chi\\_squared\\_distribution](#)  
[discrete\\_distribution](#)  
[exponential\\_distribution](#)  
[extreme\\_value\\_distribution](#)  
[fisher\\_f\\_distribution](#)  
[gamma\\_distribution](#)  
[geometric\\_distribution](#)  
[lognormal\\_distribution](#)  
[negative\\_binomial\\_distribution](#)  
[normal\\_distribution](#)  
[piecewise\\_constant\\_distribution](#)  
[piecewise\\_linear\\_distribution](#)  
[poisson\\_distribution](#)  
[student\\_t\\_distribution](#)  
[uniform\\_int\\_distribution](#)  
[uniform\\_real\\_distribution](#)  
[weibull\\_distribution](#)

**generators:**

[default\\_random\\_engine](#)  
[discard\\_block\\_engine](#)  
[independent\\_bits\\_engine](#)  
[knuth\\_b](#)  
[linear\\_congruential\\_engine](#)  
[mersenne\\_twister\\_engine](#)  
[minstd\\_rand](#)  
[minstd\\_rand0](#)  
[mt19937](#)  
[mt19937\\_64](#)  
[random\\_device](#)  
[ranlux24](#)  
[ranlux24\\_base](#)  
[ranlux48](#)  
[ranlux48\\_base](#)  
[shuffle\\_order\\_engine](#)  
[subtract\\_with\\_carry\\_engine](#)

**other:**

[generate\\_canonical](#)  
[seed\\_seq](#)

Generators that use an algorithm to generate pseudo-random numbers based on an initial seed:

<a href="#">linear_congruential_engine</a>	Linear congruential random number engine ( <a href="#">class template</a> )
<a href="#">mersenne_twister_engine</a>	Mersenne twister random number engine ( <a href="#">class template</a> )
<a href="#">subtract_with_carry_engine</a>	Subtract-with-carry random number engine ( <a href="#">class template</a> )

**Engine adaptors**

They adapt an engine, modifying the way numbers are generated with it:

<a href="#">discard_block_engine</a>	Discard-block random number engine adaptor ( <a href="#">class template</a> )
<a href="#">independent_bits_engine</a>	Independent-bits random number engine adaptor ( <a href="#">class template</a> )
<a href="#">shuffle_order_engine</a>	Shuffle-order random number engine adaptor ( <a href="#">class template</a> )

**Pseudo-random number engines (instantiations)**

Particular instantiations of generator engines and adaptors:

<a href="#">default_random_engine</a>	Default random engine ( <a href="#">class</a> )
<a href="#">minstd_rand</a>	Minimal Standard minstd_rand generator ( <a href="#">class</a> )
<a href="#">minstd_rand0</a>	Minimal Standard minstd_rand0 generator ( <a href="#">class</a> )
<a href="#">mt19937</a>	Mersenne Twister 19937 generator ( <a href="#">class</a> )
<a href="#">mt19937_64</a>	Mersene Twister 19937 generator (64 bit) ( <a href="#">class</a> )
<a href="#">ranlux24_base</a>	Ranlux 24 base generator ( <a href="#">class</a> )
<a href="#">ranlux48_base</a>	Ranlux 48 base generator ( <a href="#">class</a> )
<a href="#">ranlux24</a>	Ranlux 24 generator ( <a href="#">class</a> )
<a href="#">ranlux48</a>	Ranlux 48 generator ( <a href="#">class</a> )
<a href="#">knuth_b</a>	Knuth-B generator ( <a href="#">class</a> )

**Random number generators**

Non-deterministic random number generator:

<a href="#">random_device</a>	True random number generator ( <a href="#">class</a> )
-------------------------------	--

**Distributions****Uniform:**

<a href="#">uniform_int_distribution</a>	Uniform discrete distribution ( <a href="#">class template</a> )
<a href="#">uniform_real_distribution</a>	Uniform real distribution ( <a href="#">class template</a> )

**Related to Bernoulli (yes/no) trials:**

<a href="#">bernoulli_distribution</a>	Bernoulli distribution ( <a href="#">class</a> )
<a href="#">binomial_distribution</a>	Binomial distribution ( <a href="#">class template</a> )

<a href="#">geometric_distribution</a>	Geometric distribution ( <a href="#">class template</a> )
<a href="#">negative_binomial_distribution</a>	Negative binomial distribution ( <a href="#">class template</a> )

**Rate-based distributions:**

<a href="#">poisson_distribution</a>	Poisson distribution ( <a href="#">class template</a> )
<a href="#">exponential_distribution</a>	Exponential distribution ( <a href="#">class template</a> )
<a href="#">gamma_distribution</a>	Gamma distribution ( <a href="#">class template</a> )
<a href="#">weibull_distribution</a>	Weibull distribution ( <a href="#">class template</a> )
<a href="#">extreme_value_distribution</a>	Extreme Value distribution ( <a href="#">class template</a> )

**Related to Normal distribution:**

<a href="#">normal_distribution</a>	Normal distribution ( <a href="#">class template</a> )
<a href="#">lognormal_distribution</a>	Lognormal distribution ( <a href="#">class template</a> )
<a href="#">chi_squared_distribution</a>	Chi-squared distribution ( <a href="#">class template</a> )
<a href="#">cauchy_distribution</a>	Cauchy distribution ( <a href="#">class template</a> )
<a href="#">fisher_f_distribution</a>	Fisher F-distribution ( <a href="#">class template</a> )
<a href="#">student_t_distribution</a>	Student T-Distribution ( <a href="#">class template</a> )

**Piecewise distributions:**

<a href="#">discrete_distribution</a>	Discrete distribution ( <a href="#">class template</a> )
<a href="#">piecewise_constant_distribution</a>	Piecewise constant distribution ( <a href="#">class template</a> )
<a href="#">piecewise_linear_distribution</a>	Piecewise linear distribution ( <a href="#">class template</a> )

**Other**

<a href="#">seed_seq</a>	Seed sequence ( <a href="#">class</a> )
<a href="#">generate_canonical</a>	Generate canonical numbers ( <a href="#">function template</a> )
