**Isosceles Triangle Perimeter Formula.** An **isosceles triangle** is said if it has two equal sides and two equal internal angle. While, the **perimeter** of an **isosceles** can be found, if the base and sides are known.

### How do you solve for the perimeter of an isosceles triangle ...

<https://www.reference.com/Math/Geometry/Shapes> ▾

The **perimeter** of a **triangle** is the sum of all the sides of the **triangle**, and you determine the **perimeter** of any **triangle** by adding the lengths of all three sides. Since an **isosceles triangle** has two sides of equal length, start by multiplying the length of one of the equal sides by two.
