rosdoc_lite issue

1 day ago

Overall Rating:

Hi Alen and Alex,

I still have the same issues as seen during the labs with rosdoc_lite where the error indicates 'module' object has no attribute 'parse_package' when I try to run rosdoc_lite with my project.

I believe a fix was worked on during the class but was never concluded/shared after that.

Regards,

Yujun

Overall Rating:

If rosdoc_lite continues to persist as an error, would it be fine for me to use doxygen independently for documentation?
