c++ - <unresolved overloaded function type> - Stack Overflow<https://stackoverflow.com/questions/15841338/c-unresolved-overloaded-function-type> ▼

Apr 5, 2013 - In C++, member functions have an implicit parameter which points to the object (the this pointer inside the member function). Normal C functions can be thought of as having a different calling convention from member functions, so the **types** of their pointers (pointer-to-member-function vs pointer-to-function) ...

Apr 6, 2012 - The error tells you that there are two potential overloads that could be used, and the compiler cannot decide for you. On the other hand, you can determine which one to use by using a cast: `typedef const char *(*func_ptr)(shader::FUNC); register_enum< shader::FUNC >(L, "functions", ...`

I get this error with the following code, but i am not sure what it means? It essentially is the same as my pop method, but not erasing the key/value. 1 2 3, test3.cpp: In function 'int main()': test3.cpp:60:29: error: invalid types '<unresolved overloaded function type>[const char [4]]' for array subscript
 std::cout ...

Apr 28, 2008 - 2 posts - 2 authors

funcptr.cpp:23: error: no matching function for call to 'myclass::CallF(<unresolved overloaded function type>, int)' funcptr.cpp:16: note: candidates are: void myclass::CallF(void myclass::*)(int), int) But in windows it is giving no error. Please help me to resolve the above compilation error in linux. Thanqu.

C++: calling a member function pointer | giannis_tsakiriswww.giannitsakiris.com/2012/09/07/c-calling-a-member-function-pointer/ ▼

Sep 7, 2012 - What the error message says, more or less, is that that func1() expected to be called with an argument of type void (*), however we tried to pass an "unresolved overloaded function type". Okay, that's weird. func1() expects an argument of type void (*), and func2 was exactly of that type, right? Well, not ...

arduino mega - unresolved overloaded function type for Wire ...<https://arduino.stackexchange.com/.../unresolved-overloaded-function-type-for-wire-...> ▼

Aug 8, 2015 - `void pi::sendPI(){}`. That is a class **function** (method) which has an implicit this pointer. You can't use it as a static ISR. In general, classes cannot implement ISRs for this reason. There are a few workarounds, one being to make it a static class **function**. However then it will affect the entire class, not just one ...

<unresolved overloaded function type> - Arduino Forum<https://forum.arduino.cc/index.php?topic=67906.0> ▼

Jul 29, 2011 - 5 posts - 3 authors

Hi, I don't get the code below working (except with the wrapper function). I do not want to use the wrapper function because it kills the function callback idea. How can I write the code without writing the wrapper function? Hope you can help me, thx. This is the code that gives the error: Code: [Select].

Signal/Slot unresolved overloaded function type QSpinBox | Qt Forum<https://forum.qt.io > Qt Development > General and Desktop> ▼

Sep 3, 2016 - 7 posts - 4 authors

Hi there, Today I stumbled upon an error that comes from connecting a QSpinBox valueChanged Signal to a void member function: the connect statement: `connect(spinBoxUtc, &QSpinBox::valueChanged,`

this, &MainWindow::fillData()); and this is the private **function** fillData(): void MainWindow::fillData() ...
