Pose array - coordinates and angle?

1 day ago

Overall Rating:

Do we need to provide an angle **and** coordinate for each pose or just a coordinate?

From memory it was mentioned in class that since the robot can turn on it's spot we're not concerned about the angle- I'm just wanting to verify.

Overall Rating:

If you're doing PRM it's just the X,Y value that it needs to publish. The angle is done by the frontier exploration node.
